

Cornerstone[®] Mobile

Mobile Viewing Option for LECO Software Platform

Cornerstone Mobile provides users of our exclusive Cornerstone brand software with the ability to view data, plots, and instrument status from the convenience of their smartphone, tablet, or desktop computer. Here's how it works:

- **Connectivity**—Standard connectivity infrastructure utilizes an Internet-based server to securely pass authentication and instrument data between the Cornerstone instrument and the mobile device or computer. Server software may also be deployed on the customer's own private network.
- **Authentication**—For each Cornerstone instrument connected to the server with a matching laboratory name and key, the server forwards the user ID and password to the instrument for identification.
- **Data Storage**—Data is retained only by the Cornerstone instrument, and is not stored on the Internet-based server or accessible to any mobile device as soon as the instrument disconnects from the server.

Notifications

The Mobile option also allows the users to set email, text, or Mobile App notifications against predefined software conditions. Once authorized, the system will send notifications if the automation stalls, a check standard falls out of range, the software gets disconnected from the instrument, when a specific analysis has completed, when a software error occurs, or when a sample is aborted.

Key Features

- Safe and secure data transmission
- Broadcast to an unlimited number of devices
- Event notifications to email, text, or the Mobile App
- Access an unlimited number of systems
- Mobile is designed specifically for each platform, providing device consistency
- Immediate lab feedback to production control or management

Compatible Devices*

- Android™ smartphones
- Android tablets
- iPhone®
- iPad®
- Windows 10

*Please note that these compatible devices are not included as part of the Cornerstone Mobile Subscription and must be purchased separately.

PC App

iPad®

iPhone®

Android™

How to Subscribe

Cornerstone Mobile is offered as a subscription-based product with commitment increments of one and three years. Multiple instruments require multiple subscriptions, but there is no limit to the number of mobile device connections to each instrument. The part numbers for the subscriptions are as follows:

619-592-882-B/O One-Year Mobile Subscription
619-592-899-B/O Three-Year Mobile Subscription

Once a subscription has been purchased, you will be transferred to the LECO Service group to obtain an authorization code necessary to activate the Mobile software on your LECO system. Once the authorization code has been obtained, and the software has been restarted, you can begin the setup process as outlined in the instrument manual.

The device software or app can be obtained directly through your device store by searching LECO or LECO Cornerstone, or we can guide you to the appropriate location via the web address listed in the instrument manual.

Please contact your local LECO representative, call 800-292-6141, or visit www.leco.com for more details or to begin the process.
